SUMMARY

CSE student focused on Digital IC Design, Edge AI, and Machine Learning, with hands-on experience in digital systems, computer architecture, embedded systems, IoT, and AI. Interested in designing efficient hardware-software systems and deploying intelligent ML solutions on resource-constrained edge devices.

EDUCATION

Menoufia University, Egypt

Sep 2023 – Present

B.Sc. in Computer Science and Engineering

- **CGPA:** 3.33 / 4.0
- **Relevant Coursework:** Digital Logic Design, Computer Architecture, Microprocessors, Operating Systems, Embedded Systems

EXPERIENCE

AI in Business Trainee – NTI

Jul 2026 – Aug 2026

- Completed **90+ hours** of hands-on training in **Machine Learning, and Deep Learning**.
- Applied **Scikit-learn and TensorFlow/PyTorch** through practical ML assignments and project-based applications.

A2SV – Africa to Silicon Valley

Jan 2026 – Apr 2026

- Completed an intensive program in Python, Data Structures, Algorithms, and Problem Solving.
- Solved **175+ problems** and contributed to **110+ sessions**, strengthening algorithms, problem-solving, and peer mentoring.

Data Analysis – DEPI

Jun 2025 – Dec 2025

- Applied Python, Excel, and Power BI for data cleaning, analysis, and visualization.
- Built interactive dashboards and reports to communicate data-driven insights. .

SIC6 IoT – Samsung Electronics Egypt

Jul 2024 – Sep 2024

- Completed **160+ hours** of hands-on training in IoT, Python, networking, and embedded systems.
- Developed Raspberry Pi-based IoT applications integrating hardware, software, and cloud services.

PROJECTS

Cache Memory Controller

Verilog — Vivado

- Designed and verified a configurable cache controller with **tag comparison, hit/miss detection, and FSM-based control**

Synchronous FIFO Buffer

Verilog — Vivado

- Designed and verified a parameterized **synchronous FIFO** with full/empty detection and RTL testbench.

TinyML Keyword Spotting

Python — TensorFlow

- Built a lightweight speech-command classifier using **MFCC features and a compact neural network** for resource-constrained deployment.

VOLUNTEERING

IEEE Al-Azhar

Nov 2024 – Present

- Promoted from Member to **Vice Data Science** based on performance and contributions.
- Contributed to **4 technical camps**, leading **2 camps** with full responsibility for their execution.
- Delivered **25+ technical sessions** in Python, Data Science and AI.

Head of Operations – Rally

Oct 2025 – Present

- Played a key role in **rebuilding and developing the team**, taking ownership of major organizational responsibilities.
- Led the planning and execution of **2 major events with 100+ attendees**, strengthening leadership, coordination, and execution skills.

SKILLS

- **Programming:** Assembly, C/C++, Python, Verilog, SQL
- **AI:** Scikit-learn, TensorFlow, PyTorch, Pandas, CNNs, RNNs, Model Deployment
- **Embedded Systems:** PIC, Arduino, ESP32, Raspberry Pi, IoT, Networking
- **Development Tools:** Vivado, ModelSim, Git, Proteus, Linux
